

Starved Rock Lodge and Conference Center

The trails are open all year, but hikers are urged to exercise extreme caution and to stay on official trails. To keep you oriented, trail maps are located at all trail access points, intersections and points of interest. There are colored markings along the trails, corresponding to colors on the maps, and on the trail brochure to further assist you. Finally, yellow dots on trees or posts indicate that you are moving away from the lodge or visitor center, and white dots mean you are returning.

Exploring the majestic bluffs and canyons is the park's primary attraction, and there are 13 miles of well-marked trails to help you enjoy them.

Hiking

For continuously updated information on park programs and activities tune to radio station 1610 AM. Generally open daily, the visitor center offers displays and exhibits explaining the park's cultural and natural history. A weekly schedule of activities and movies is posted. Schools and other organized groups may arrange reservations for programs by contacting the center at (815) 667-4906 or writing to Program Coordinator, Starved Rock State Park, P.O. Box 509, Utica, IL 61373.

Visitor Center

ish-white berries provide an important food source for birds.

Special Events

Starved Rock State Park is host to a number of enjoyable annual events, including the Winter Wilderness and Eagle Watch weekends in January, The Annual Wildflower Pilgrimage in Spring, and the Fall Colors Weekend in October.

French Canyon

Lodging

Situated on a high bluff just southwest of the rock itself is the stone and log lodge built in part by the Civilian Conservation Corps in the 1930s. The lodge has been refurbished, but still reflects the peaceful atmosphere of yesteryear. The hotel features an indoor swimming pool, children's pool, whirlpool, saunas and an outdoor sunning patio.

The lodge offers 72 luxury hotel rooms and 22 comfortable cabin rooms. The original Great Room is furnished with decorative rugs and art and is centered around a massive stone fireplace.

The restaurant is open seven days a week and offers many house specialties. It can accommodate up to 250 people for banquets. The lodge's conference area can accommodate up to 200 with four smaller meeting rooms also available.

For lodge reservations, call 1-800-868-ROCK (7625) or (815) 667-4211, or write Starved Rock Lodge and Conference Center, P.O. Box 570, Utica, IL 61373.

The poison ivy plant is found in all areas of the park. Its green or orange columbine and the magenta blooms of shooting star. Dutchman's breeches, plus purple-flowered spiderworts, nodding tulip lichen and mosses, marsh marigolds, wild iris, trillium and varied as they are beautiful. Included in the floral array are colorful throughout spring and summer, wildflowers are as plentiful and At the forest edge, bright blue indigo bunnings fit through the wild crab apple and plum trees that skirt the former glacial till prairie, while cottontail rabbits scamper through the bluestem and Indian grasses. In the sandy prairie soil, prickly pear cactus grows alongside lead plant, compass plant and rattlesnake master. White-tailed deer come to munch on the sumac, and red-tailed hawks soar overhead in search of voles and field mice.

Farther away from the bluffs, red oaks and hickories predominate in deeper soils. Typical prairie plants characteristic of the forest floor include the American witch hazel, black huckleberry and bracken fern. Nuthatches and chickadees feed on nuts, seeds and insects found in the bark of trees. Raccoons and flying squirrels spend many hours searching for and gathering berries and nuts.

return to feed on sap and small insects. Serviceberry and northern honeysuckle--shrubs that prefer a well-drained area--attract scarlet tanagers and cedar waxwings.

History

This area has been home to humans from as early as 8000 B.C. Hopewellian, Woodland and Mississippian Native American cultures thrived here. The most recent and probably the most numerous group of Native Americans to live here was the Illiniwek, from the 1500s to the 1700s. Approximately 5,000 to 7,000 Kaskaskias, a subtribe of the Illiniwek, had a village extending along the bank of the Illinois River across from the current park.

In 1673, French explorers Louis Jolliet and Father Jacques Marquette passed through here on their way up the Illinois from the Mississippi. Known as "Pere," the French word for "Father," Marquette returned two years later to found the Mission of the Immaculate Conception—Illinois' first Christian mission—at the Kaskaskia Indian village.

When the French claimed the region (and, indeed, the entire Mississippi Valley), they built Fort St. Louis atop Starved Rock in the winter of 1682-83 because of its commanding strategic position above the last rapids on the Illinois River. Pressured from small war parties of Iroquois in the French and Indian wars, the French abandoned the fort by the early 1700s and retreated to what is now Peoria, where they established Fort Pimitoui. Fort St. Louis became a haven for traders and trappers, but by 1720 all remains of the fort had disappeared.

Starved Rock State Park derives its name from a Native American legend of injustice and retribution. In the 1760s, Pontiac, chief of the Ottawa tribe upriver from here, was slain by an Illiniwek while attending a tribal council in southern Illinois. According to the legend, during one of the battles that subsequently occurred to avenge his killing, a band of Illiniwek, under attack by a band of Potawatomi (allies of the Ottawa), sought refuge atop a 125-foot sandstone butte. The Ottawa and Potawatomi surrounded the bluff and held their ground until the hapless Illiniwek died of starvation—giving rise to the name "Starved Rock."

The Illinois State Parks Commission was initially headquartered in Starved Rock State Park after the park was purchased in 1911 and totals 2,816 acres.

Black oak, red cedar and white oak, as well as white pine and white cedar, grow on the drier, sandy bluff tops. Yellowbellied sapsuckers drill parallel rows of small holes on cedar trees and can be seen as you walk along the River Trail. dling along the river's edge. Evidence of beavers and muskrats ducks that nest in hollow trees occasionally can be seen pad-ton, including woodchucks, moles, vireos and catbirds. Wood-lush vegetation supports an abundant wildlife and bird population, providing vantage points for enjoying spectacular vistas. The porous sandstone bluffs allow water to soak quickly through, only to collect in greater quantities on the slopes below. The resulting and rains are frequent, sparking waterfalls are found at the heads of all 18 canyons, and vertical walls of moss-covered stone create a setting of natural geologic beauty uncommon in Illinois. Some of the longer-lasting waterfalls are found in During early spring, when the end of winter thaw is occurring

LaSalle and St. Louis canyons.

- While groups of 25 or more are welcome and encouraged to use the park's facilities, they are required to register in advance with the site office to avoid crowding or scheduling conflicts.
- At least one responsible adult must accompany each group of 15 minors.
- Pets must be kept on leashes at all times and cannot be in the nature preserve.
- Actions by nature can result in closed roads and other facilities. We hope you enjoy your stay. Remember, take only memories, leave only footprints.
- For more information on state parks, write to the Department of Natural Resources, Clearinghouse, One Natural Resources Way, Springfield, IL 62702-1271 visit our website at www.dnr.state.il.us.
- For more information on tourism in Illinois, call the Illinois Department of Commerce and Economic Opportunity's Bureau of Tourism at 1-800-2CONNECT.
- Hearing-impaired individuals may call the Department of Natural Resources' TTY number, (217) 782-9175, or use the Ameritech Relay Number, 1-800-526-0844.

Equal opportunity to participate in programs of the Illinois Department of Natural Resources (IDNR) and those funded by the U.S. Fish and Wildlife Service and other agencies is available to all individuals regardless of race, sex, national origin, disability, age, religion or other nonmerit factors. If you believe you have been discriminated against, contact the funding source's civil rights office and/or the Equal Employment Opportunity Officer, IDNR, One Natural Resources Way, Springfield, IL 62702-1271; (217) 785-0067; TTY (217) 782-9175.

While the areas along the river and its tributaries still are predominantly forested, much of the area is a flat, gently rolling plain. The upland prairies were created during an intensive warming period several thousand years after the melting of the glaciers. The Illinois River Valley in the Starved Rock area is a major contrast to the flatland. The valley was formed by a series of floods as glacial meltwater broke through moraines, sending torrents of water surging across the land and deeply eroding the sandstone and other sedimentary rocks.

The park is best known for its fascinating rock formations, primarily St. Peter sandstone, laid down in a huge shallow inland sea more than 425 million years ago and later brought to the surface.

LaSalle Canyon

Starved Rock State Park Experience the fun of outdoor adventure at Starved Rock State Park. Whether you enjoy hiking along the nature trails or viewing the many spectacular overlooks along the Illinois River, recreational opportunities abound. From picnicking to fishing to boating, from horseback riding to camping to enjoying winter sports, there's so much to do that you'll come back again and again.

Due to the park's fragile ecosystem, camping is prohibited in unauthorized areas and all rock climbing, rappelling or scrambling off trails is prohibited. **Biking is not allowed on the hiking trails.** For your own safety, you must be off the trails by dark. **Alcohol is prohibited on all trails.**

Fishing and Boating

Boats may be launched from the west end of the park. A paddlewheel boat ride and canoe rental is available May through October. Catfish, bullhead, white bass, sauger, walleye, carp and crappie may be caught in the Illinois River. Boats are not allowed within 600 feet of the dam, as strong currents and powerful undertows can be dangerous. Under no circumstances should you attempt to wade or swim in the river, canyons or from any park shoreline.

Winter Activities

Cross-country skiing can be enjoyed at nearby Matthiessen State Park. Cross-country ski rentals are available at Matthiessen Dells Area on week-ends December through March. Eagle viewing is a popular winter activity enjoyed by many. Two places to see the eagles are the top of Starved Rock and the Illinois Waterway Visitor Center.

Snowmobiling is not allowed anywhere at Starved Rock, but is allowed at the I & M Canal one mile to the north in Utica.

Picnicking

Developed picnic areas are available to the day visitor, with tables, drinking water and restroom facilities. Eight shelters are available on a first-come, first-served basis. **Alcohol is prohibited Jan. 1 through May 31 in the picnic area.**

Camping

The campground has 133 Class A premium campsites with electricity, showers and flush toilets, a separate youth group camping area and a children's playground. Seven campsites are accessible for people with disabilities. Reservations are accepted all year through reserveamerica.com. **Alcohol is prohibited in the campground.**

Recreational Trails Program

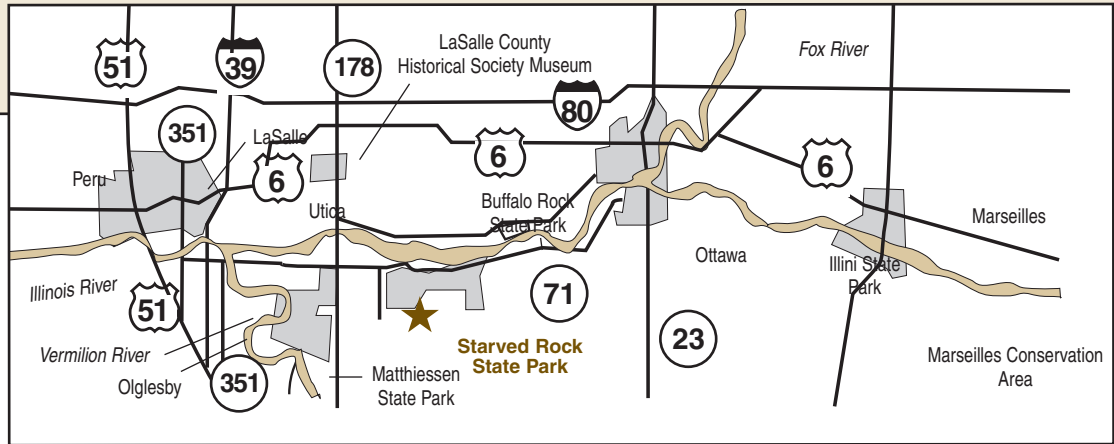

The Recreational Trails Program (RTP) monies are funded through the Federal Motor Fuel Tax and administered through the National Recreational Trails Fund Act. Trail projects are supported by the federal government, which provides up to 80% reimbursement of cost. State funds provide the balance of the funding for the projects. The trails program encourages trails management practices to serve a wide variety of trail users. The program is administered in Illinois by the Department of Natural Resources in cooperation with the Illinois Department of Transportation.

Exotic Species

Plants and animals not native to Illinois are exotic species. Most of them are harmless to our state; however, some can be very invasive to native plant communities and can overwhelm or wipe out native species. Prevention and control of exotic, invasive species requires tremendous cooperation between managers and all users of parks, natural areas, and privately owned land. To learn more about exotic and invasive species and how you can help prevent their spread, visit the IDNR Exotic Species Website at: <http://www.dnr.state.il.us/lands/education/ExoticSpecies/exoticspintro.htm>.

For more information, contact Starved Rock State Park, P.O. Box 509, Utica, IL 61373, phone (815) 667-4726.

This trail brochure was made possible due to funding provided by the Starved Rock Foundation.

Help Our Parks Endeavors (H.O.P.E. FUND)

Please consider making a contribution to the H.O.P.E. fund at any of our State Parks or State Fish and Wildlife Areas. Donation boxes are located near visitor centers, interpretive centers, concession buildings, campground host locations, and check stations. Sites without donation boxes can accept cash donations. Make your check payable to the IDNR-Hope Account. Your donation remains at that site. You can also specify how you would like the funds spent (site improvements, special projects, purchases, etc.). Help us maintain our parks for future generations. Donate today.
